

biology section biodiversity guide pdf

Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

Chapter 54: Community Ecology - Biology Junction

Compared to other threats to biodiversity, invasive introduced species rank second only to habitat destruction, such as forest clearing. Of all 1,880 imperiled species in the United States, 49% are endangered because of introduced species alone or because of their impact combined with other forces.

A biodiversity action plan (BAP) is an internationally recognized program addressing threatened species and habitats and is designed to protect and restore biological systems. The original impetus for these plans derives from the 1992 Convention on Biological Diversity (CBD). As of 2009, 191 countries have ratified the CBD, but only a fraction of these have developed substantive BAP documents.

Linnaean Gardens: 18th and 19th centuries Gradually, a strict utilitarian display gave way to a comprehensive study of plants. Based on the work of Carolus Linnaeus (1707-1778), 15 the father of modern taxonomy, gardens were laid out to show plant relationships. Live and preserved material poured into the botanical gardens of Europe, especially from the New World, to be exhibited, studied, and ...
