A specular highlight is the bright spot of light that appears on shiny objects when illuminated (for example, see image at right). Specular highlights are important in 3D computer graphics, as they provide a strong visual cue for the shape of an object and its location with respect to light sources in the scene.

§4. The P and D family of associate. minimal surfaces. Schwarz's P and D surfaces and their associate surface G (the gyroid) are the topologically simplest examples of embedded TPMS that have cubic lattice symmetry.They are related by the continuous bending transformation described in 1853 by Ossian Bonnet.The mean curvature (which is zero at every point), the Gaussian curvature, and the ...

Image Level Adjustments The most basic form of adjustment you can make to images are known as 'level'

adjustments. This basically means taking the individual RGB color values (or even the alpha channel values) and adjusting them so as to either stretch or compress those values.
