

impact factor scientific journals pdf

Journal Impact Factor (IF) is a measure reflecting the average number of citations to articles published in science and social science journals. It is frequently used as a proxy for the relative importance of a journal within its field, with journals with higher impact factors deemed to be more important than those with lower ones. via Wikipedia.

JCR Impact Factors List 2013 - Iran University of Science

Impact factor is commonly used as a tool for managing scientific library collections. Librarians faced with finite budgets must make rational choices when selecting journals for their departments and institutions. Impact factor helps guide those choices by determining which journals are most frequently cited.

Impact factor: a valid measure of journal quality?

Impact Factor Trend Graph This graph shows the Impact Factor of a journal over the last five years. It measures the frequency with which the average article in a journal is cited in a particular year, and compares the impact of a journal over the last five years. Five-Year Impact Factor The Five-Year Impact Factor is the average

Impact Factor: The impact factor is a measure of the frequency in which the average article in a journal is cited in a particular year. Impact factors measure the impact of a journal, not the impact of individual articles.

Measuring Your Impact: Impact Factor, Citation Analysis

The annual JCR impact factor is a ratio between citations and recent citable items published. Thus, the impact factor of a journal is calculated by dividing the number of current year citations to the source items published in that journal during the previous two years (see Figure 1).
