ground loop tutorial - Ebtech - Audio

People with hearing loss can dream of a future when hearing aids might also serve as wireless loudspeakers, delivering clear, customized sound from inside their ears.

Hearing Loop

An induction or inductive loop is an electromagnetic communication or detection system which uses a moving magnet or an alternating current to induce an electric current in a nearby wire. Induction loops are used for transmission and reception of communication signals, or for detection of metal objects in metal detectors or vehicle presence indicators.

Induction loop - Wikipedia

Loop offers affordable zero-emissions to urban environments where it is demanded most. Serving the medium-to-heavy duty truck and bus markets, Loopâ€™s FC-REX acts as a range-extending generator for battery electric vehicles to provide extended range, high-torque for heavy loads, quick fill-ups and combustion-free transport.

Loop Energy

For Loopsâ€™. The for loop allows us to repeat certain commands. If you want to repeat some action in a predetermined way, you can use the for loop. All of the loop structures in matlab are started with a keyword such as for, or while and they all end with the word end. Another deep thought, eh.

Managing Backcountry Use The permit system is in place to help ensure that park resources are protected while providing a quality backcountry experience.

Grand Teton - National Park Service

If you are uncomfortable with the thought of winding the 9:1 transformer, don't let that put you off. It is a very simple task to construct it, and there is nothing really critical about its fabrication.

A Very Simple Broadband Receive Loop for the - W1AEX

As others have mentioned you'd need to use a for loop to do this in-place. However, if you don't need the operation to be done in-place (i.e. the results can be a different collection), then you could also do it as a link query, e.g.

c# string.replace in foreach loop - Stack Overflow

Feedback occurs when outputs of a system are routed back as inputs as part of a chain of cause-and-effect that forms a circuit or loop. The system can then be said to feed back into itself. The notion of cause-and-effect has to be handled carefully when applied to feedback systems: Simple causal reasoning about a feedback system is difficult because the first system influences the second and ...
