Accounting fundamentals course overview. This free 2-part accounting fundamentals course will guide you through the accounting process. We explore the layout of the balance sheet, income statement, and cash flow statement; and demonstrate how to prepare financial statements from scratch.

Accounting Fundamentals Course - Corporate Finance Institute

Deterministic modeling process is presented in the context of linear programs (LP). LP models are easy to solve computationally and have a wide range of applications in diverse fields. This site provides solution algorithms and the needed sensitivity analysis since the solution to a practical problem is not complete with the mere determination of the optimal solution.

A security is a tradable financial asset. The term commonly refers to any form of financial instrument, but its legal definition varies by jurisdiction. In some jurisdictions the term specifically excludes financial instruments other than equities and fixed income instruments. In some jurisdictions it includes some instruments that are close to equities and fixed income, e.g., equity warrants.

Forecasting is the process of making predictions of the future based on past and present data and most commonly by analysis of trends. A commonplace example might be estimation of some variable of interest at some specified future date. Prediction is a similar, but more general term. Both might refer to formal statistical

methods employing time series, cross-sectional or longitudinal data, or ...
