Interprofessional collaboration is a key component to patient safety and health profession education. This article will describe the development and implementation of a pilot educational teaching/learning simulation exercise designed to promote teamwork and collaboration between medical students and nursing students.

Developing interprofessional communication skills

Introduction The ability to communicate ideas effectively is increasingly recognized as critical to the success of the healthcare system. Effective communication is required not only for successful interactions between individuals and their health care providers (1) but also between health care providers themselves.
