1. INTRODUCTION - A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is, a weak input signal can be amplified (made stronger) by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be ...

1.. Introduction Predictive modeling of species geographic distributions based on the environmental conditions of sites of known occurrence constitutes an important technique in analytical biology, with applications in conservation and reserve planning, ecology, evolution, epidemiology, invasive-species management and other fields Corsi et al., 1999, Peterson and Shaw, 2003, Peterson et al ...

Maximum entropy modeling of species geographic

1. Introduction. To comply with global water policy focussed on responsible management of water resources and protection of public health, wastewater collected from municipalities and communities must be treated to achieve levels imposed by discharge permits and maximum daily loads, allowing its subsequent return to receiving water bodies, or to the land or even to be reused.

Mattering in a dementia care home The Butterfly Approach

I am using the texmaker editor for writing the presentations and MikTeX in the background to convert my tex files into the pdf documents.. The TeX archive will have the beamer user guide which has some useful parts at the start although it can be large and daunting for a new user.. I am intending to work through the other features that we might want to add to a presentation in subsequent posts ...

Creating a Presentation with LaTeX Beamer

Introduction. Maintaining or improving soil health is essential for sustainable and productive agriculture. "Healthy" soil will help to push sustainable agricultural productivity close to the limits set by soil type and climate. Key aspects of "healthy" soil include the following:

Linear programming (LP, also called linear optimization) is a method to achieve the best outcome (such as

maximum profit or lowest cost) in a mathematical model whose requirements are represented by linear relationships. Linear programming is a special case of mathematical programming (also known as mathematical optimization).. More formally, linear programming is a technique for the ...

0. What is card modeling? 0.1 Scale Modeling in Paper Card Modeling or Paper Modeling is the art of creating scale models with paper. Models are built up from appropriately colored, cut, and folded pieces of paper, usually a stiff cardstock.

Card Modeling FAQ

Preface. This introduction to R is derived from an original set of notes describing the S and S-PLUS environments written in 1990â€”2 by Bill Venables and David M. Smith when at the University of Adelaide. We have made a number of small changes to reflect differences between the R and S programs, and expanded some of the material.

An Introduction to R

Modeling and simulation (M&S) in simple terms is a substitute for physical experimentation, in which computers are used to compute the results of some physical phenomenon. As it is apparent from its name "Modeling and simulation" firstly a computer is used to build a mathematical model which contains all the parameters of physical model and represent physical model in virtual form then ...

Introduction. Research on dialogue is concerned with the study of how communication takes place through language in conversation. This involves, among other things, investigating what makes a dialogue coherent; how dialogue participants coordinate to take turns in speaking and to achieve mutual understanding; and how knowledge about how dialogue works can be used to design artificial agents ...

Dialogue - Linguistics - Oxford Bibliographies

Introduction. With more than 10 years experience programming in R, Iâ€™ve had the luxury of being able to spend a lot of time trying to figure out and understand how the language works.

Climate-smart agriculture (CSA) goes beyond new technologies and practices like drought resistant varieties or precision farming. To achieve the multiple objectives of productivity and food security, enhanced farmer resilience and reduced greenhouse gas emissions, CSA must adopt various systems perspectives. These include landscapes and ecosystems, as well as value chains.
