Destructive Role of Employee Silence in Organizational Success

Organizational conflict, or workplace conflict, is a state of discord caused by the actual or perceived opposition of needs, values and interests between people working together. Conflict takes many forms in organizations. There is the inevitable clash between formal authority and power and those individuals and groups affected. There are disputes over how revenues should be divided, how the ...

1. Introduction. Performance evaluations involve comparison to standards, and the characteristics of the standards determine the consequences of the evaluations (Locke & Latham, 2002). For example, other people's performance is frequently used as a standard to assess the focal individual's achievement (Festinger, 1954, Wood, 1989). This process of social comparison has been shown to exert ...
