The neck is the part of the body, on many vertebrates, that separates the head from the torso. It contains blood vessels and nerves that supply structures in the head to the body. These in humans include part of the esophagus, the larynx, trachea, and thyroid gland, major blood vessels including the carotid arteries and jugular veins, and the top part of the spinal cord.

Magnetic resonance imaging (MRI) is a medical imaging technique used in radiology to form pictures of the anatomy and the physiological processes of the body in both health and disease. MRI scanners use strong magnetic fields, magnetic field gradients, and radio waves to generate images of the organs in the body. MRI does not involve X-rays or the use of ionizing radiation, which distinguishes ...

Jamie Ranse website. ABSTRACT Introduction: Despite the frequency with which critical care nursesâ€™™ engage in end-of-life care, preparation and support of nurses for this work through professional development opportunities or postgraduate education is reportedly limited. Objectives: To identify and describe end-of-life care content in postgraduate critical care nursing courses in Australia.
