The graphical user interface (GUI / ˈɡɪːuːɪ /) is a form of user interface that allows users to interact with electronic devices through graphical icons and visual indicators such as secondary notation, instead of text-based user interfaces, typed command labels or text navigation. GUIs were introduced in reaction to the perceived steep learning curve of command-line interfaces (CLIs ...

Text mode and graphics mode If you enter the links command without any options, the browser will open in text mode. You will see text but no images. If you are running in a virtual console, rather than an xterm on your graphical desktop, you will need to have the gpm daemon running in order to be able to use the mouse.
