**AMFI - Herbal Medicine Resource Guide**

Herbalism (also herbal medicine) is the study of botany and use of plants intended for medicinal purposes. Plants have been the basis for medical treatments through much of human history, and such traditional medicine is still widely practiced today. Modern medicine makes use of many plant-derived compounds as the basis for evidence-based pharmaceutical drugs.

The Rosy Periwinkle (*Catharanthus roseus*, Apocynaceae) represents a classical example of the importance of plants used by local peoples. This herbaceous plant, native to southeastern Madagascar, is the source of over 75 alkaloids, two of which are used to treat childhood leukaemia and Hodgkin's disease with a very high rate of success.
