Wiring RS-485 Networks - Power Rich System

We show, via a massive ($N = 689,003$) experiment on Facebook, that emotional states can be transferred to others via emotional contagion, leading people to experience the same emotions without their awareness. We provide experimental evidence that emotional contagion occurs without direct interaction ...

Experimental evidence of massive-scale emotional contagion

With Cisco Mobility Express solutions, businesses of all sizes easily set up wireless LAN (WLAN) networks for employees and customers. Explore our wireless and mobility solutions.

EIE: Efficient Inference Engine on Compressed Deep Neural

Artificial Neural Networks (ANN) or connectionist systems are computing systems vaguely inspired by the biological neural networks that constitute animal brains. The neural network itself is not an algorithm, but rather a framework for many different machine learning algorithms to work together and process complex data inputs. Such systems "learn" to perform tasks by considering examples ...

Dropout: A Simple Way to Prevent Neural Networks from Over

There are many types of artificial neural networks (ANN).. Artificial neural networks are computational models inspired by biological neural networks, and are used to approximate functions that are generally unknown. Particularly, they are inspired by the behaviour of neurons and the electrical signals they convey between input (such as from the eyes or nerve endings in the hand), processing ...

Hierarchical networks have advantages over flat network designs. The benefit of dividing a flat network into smaller, more manageable hierarchical blocks is that local traffic remains local.

Introducing Network Design Concepts

Conduct pre-testing with minimal resources. The FindFiber Remote ID source is a new platform in the Fluke Networks family. When used with the optical power meter, these remote ID sources allow for quick and easy cable-routing identification.
